

PARVEEN KUMAR

Full Stack Developer | Java · Spring Boot · Node.js · React · Next.js · Django

📍 Patna, Bihar, India | Parveen_24a12res426@iitp.ac.in | [linkedin.com/in/parveen-kumar-664b8b24b](https://www.linkedin.com/in/parveen-kumar-664b8b24b) | github.com/Parveen-collab | my-portfolio-black-chi-37.vercel.app

PROFESSIONAL SUMMARY

Full Stack Developer with 1+ year of hands-on software development experience building end-to-end web applications using React.js, Next.js, TypeScript, Java (Spring Boot), Node.js, Express.js, and Django. Skilled in RESTful API design, microservices architecture, JWT/OAuth2 authentication, relational and NoSQL databases (MySQL, PostgreSQL, MongoDB), Docker, CI/CD pipelines, and AWS/Azure cloud deployment. Proven ability to own features from database schema to pixel-perfect UI, deliver measurable performance improvements, and integrate AI-powered capabilities. Currently pursuing B.S. in Computer Science & Data Analytics at IIT Patna.

TECHNICAL SKILLS

Frontend

React.js · Next.js · TypeScript · JavaScript (ES6+) · HTML5 · CSS3 · Tailwind CSS · Material UI

APIs & Auth

REST API Design · JWT Authentication · OAuth2 · Microservices · Swagger/OpenAPI · WebSockets

Cloud & DevOps

Docker · AWS · Azure · CI/CD · GitHub Actions · Linux · Nginx · Deployment Automation

AI Integration

OpenAI API · RAG Applications · AI Agents · Prompt Engineering · LangChain

Backend & Runtimes

Java · Spring Boot · Spring Security · Node.js · Express.js · Django · Django REST Framework · Hibernate/JPA

Databases

MySQL · PostgreSQL · MongoDB · Redis · Query Optimization · Schema Design · Indexing

Software Engineering

System Design (HLD/LLD) · OOP · Design Patterns · SDLC · Agile/Scrum · Testing & Debugging

Tools

Git · GitHub · Postman · Jira · VS Code · IntelliJ IDEA · Figma

PROFESSIONAL EXPERIENCE

Full Stack Developer Intern · Yuktisoft Infotech LLP

Jan 2025 – Present

- Developed and shipped 10+ full-stack features end-to-end using React.js, Next.js, TypeScript (frontend) and Node.js/Express.js REST APIs (backend), reducing feature delivery time by ~30%.
- Built and integrated a Django REST Framework microservice for data export (CSV/PDF reports), processing 500+ export requests daily with <200ms average response time.
- Designed and maintained RESTful API contracts (Swagger/OpenAPI) across 3 backend services, cutting frontend-backend integration bugs by ~40%.
- Constructed reusable React component library of 25+ components with Tailwind CSS and Material UI, adopted across 4 projects and saving ~15 hrs/sprint of redundant dev work.
- Integrated data visualization dashboards using ApexCharts and Recharts, displaying real-time KPIs for 200+ internal users.
- Improved application Lighthouse performance score from 68 to 91 through lazy loading, code splitting, and image optimization.
- Followed Git branching strategies, Agile/Scrum ceremonies, and CI/CD pipelines (GitHub Actions) — contributing to a team maintaining 99%+ uptime in staging.

PROJECTS

Production-Scale Hiring Platform — Full Stack Flagship Project

Stack: *Java · Spring Boot · Spring Security · Node.js · Express.js · MySQL · PostgreSQL · Redis · React · Next.js · Docker · AWS · GitHub Actions CI/CD*

- Architected and built a production-scale hiring platform serving employers, recruiters, and job seekers — designed for 10,000+ concurrent users via horizontal microservices scaling.
- Implemented dual-backend architecture: Java/Spring Boot for core business logic and Node.js/Express.js for real-time notification microservice processing 1,000+ events/minute.
- Secured platform with JWT + OAuth2 authentication and role-based access control (Spring Security), achieving zero unauthorized access incidents across all test cycles.
- Designed and exposed 45+ RESTful API endpoints (user management, job postings, applications, analytics) documented with Swagger/OpenAPI; average response time <120ms.
- Engineered MySQL + PostgreSQL database schemas with normalized design, composite indexing, and query optimization — reducing complex query execution time by ~50%.
- Integrated Redis caching layer on high-traffic endpoints, cutting average API response latency by ~40% under load testing.
- Containerized all services with Docker and deployed on AWS via GitHub Actions CI/CD pipeline, achieving 99.9% uptime in staging environment.
- Built responsive Next.js + TypeScript frontend with Tailwind CSS achieving Lighthouse scores of 92+ across all pages.

Node.js & Express.js — Real-Time Collaboration API

Stack: *Node.js · Express.js · WebSockets · MongoDB · Redis · JWT · Docker*

- Built a real-time REST + WebSocket API server using Node.js and Express.js, supporting live document collaboration for up to 500 concurrent connections.
- Implemented JWT-based stateless authentication middleware and rate-limiting in Express.js, handling 5,000+ requests/minute under stress testing.
- Designed MongoDB document schema for collaborative workspaces with Redis pub/sub for real-time event broadcasting — achieving <50ms message delivery latency.
- Deployed containerized Node.js service on AWS EC2 with Nginx reverse proxy and automated Docker deployments via GitHub Actions.

Django Full Stack — Analytics & Reporting Platform

Stack: *Python · Django · Django REST Framework · PostgreSQL · Celery · Redis · React · Next.js · Docker*

- Developed a full-stack analytics platform: Django REST Framework backend + React/Next.js frontend — enabling teams to ingest, process, and visualize large datasets.
- Implemented Celery + Redis async task queue for background data processing jobs, reducing API response time from ~8s to ~180ms for large dataset operations.
- Built 20+ Django REST API endpoints with pagination, filtering, and serialization; secured with JWT token rotation and Django's permission system.
- Designed PostgreSQL schema with materialized views and composite indexes, achieving ~60% reduction in read query latency on 1M+ row datasets.
- Containerized with Docker Compose; achieved 87% test coverage using Django's unittest framework and pytest.

NirmaanSetu — Global Construction Ecosystem Platform

Stack: *Next.js · React · TypeScript · Tailwind CSS · REST APIs · Node.js*

- Developed a global-scale construction industry platform connecting contractors, vendors, and site managers across multiple stakeholder workflows.
- Built Node.js API integration layer consuming 8+ third-party REST APIs, normalizing data into unified frontend contracts.
- Achieved Lighthouse performance score of 90+ through SSR optimization in Next.js and responsive Tailwind CSS layouts across all device breakpoints.

CosmoVista — Space Exploration Platform

Stack: *Next.js · TypeScript · NASA APIs · REST · Node.js*

- Built dynamic space exploration platform with modules for Mars Rover Explorer, Asteroid Tracking, and NASA Media Library — consuming 5+ external REST APIs.
- Implemented Node.js proxy server to handle NASA API rate limits and cache responses, reducing redundant API calls by ~70%.

- Relevant Coursework: Data Structures & Algorithms, Database Management Systems, Operating Systems, Computer Networks, Software Engineering, Data Analytics.
- Applying full-stack development, system design, and data analytics skills through internship projects, open-source contributions, and independent software development.

ACHIEVEMENTS & HIGHLIGHTS

- Built 4 production-ready full-stack applications spanning Java/Spring Boot, Node.js/Express.js, Django REST Framework, and React/Next.js — covering the complete full-stack spectrum.
- Delivered measurable impact: 40% API latency reduction, 30% faster feature delivery, 91 Lighthouse performance score, 87%+ test coverage across projects.
- Completed 1+ year software development internship at Yuktisoft Infotech LLP, contributing to production systems used by real end users.
- Implemented AI integrations using OpenAI APIs, RAG architectures, and AI Agents — delivering intelligent features in full-stack applications.
- Maintained active GitHub portfolio with deployed applications; solved 100+ DSA problems for technical interview preparation.
- German Language Proficiency — B1 Level (Goethe Institut).
