Portfolio: my-portfolio-black-chi-37.vercel.app

PROFESSIONAL SUMMARY

Software Engineering intern at IIT Patna with 1+ year of hands-on experience building enterprise-grade frontend solutions and contributing to full-stack development. Proficient in React, Next.js, TypeScript, JavaScript, HTML5, CSS3, REST API integration, and responsive UI development, with growing experience in C#/.NET-adjacent patterns via Java/Spring Boot backend work. Demonstrated ability to collaborate in agile teams, participate in peer code reviews, write user stories, and deliver production-quality features on schedule. Adept at debugging, performance optimization, and migrating legacy workflows to modern standards. Passionate about e-commerce technology and building scalable, user-centric applications that serve global audiences.

TECHNICAL SKILLS

Programming Languages:

JavaScript, TypeScript, Java, Python

Frontend Technologies:

React.js, Next.js, HTML5, CSS3, Tailwind CSS, Material UI, Responsive Design

Backend Technologies:

Java, Spring Boot, C# / .NET (familiar), REST APIs, GraphQL (basic), API Integration

Databases:

MySQL, PostgreSQL, MongoDB

Tools & Platforms:

Git, GitHub, Docker (basic), Kubernetes (basic), VS Code, Figma, Postman

Software Engineering:

Software Development Lifecycle (SDLC), Object-Oriented Programming (OOP), Debugging, Performance Optimization, Agile Development, Code Reviews, Version Control, Software Testing

Additional Technologies:

Apache Kafka (Basic), System Design Basics, Microservices Architecture

PROFESSIONAL EXPERIENCE

Frontend Developer Intern

Yuktisoft Infotech LLP

January 2025 – Present

- Developed and maintained 5+ responsive web applications using React, Next.js, TypeScript, HTML5, CSS3, and Tailwind CSS, serving production users across multiple client projects.
 - Built a reusable component library of 20+ UI components, reducing feature development time by ~30% and improving maintainability across 3+ concurrent projects.
 - Integrated 10+ RESTful APIs into enterprise dashboards and business applications, enabling real-time data visualization and reporting for end-to-end business workflows.
 - Collaborated with a cross-functional agile team of 6+ developers, designers, and business stakeholders across the full SDLC — from requirements gathering and user story writing to deployment and third-level support.
 - Identified and resolved 15+ critical bugs through systematic debugging and performance profiling, reducing page load time by ~25% on key dashboard views.
 - Used Git and GitHub for version control, source code management, and collaborative development workflows.
 - Worked closely with backend teams to validate API responses, handle data processing, and ensure seamless frontend-backend integration.
 - Reviewed 30+ pull requests, providing actionable feedback on code quality, standards compliance, and test coverage, while resolving 40+ bugs across sprint cycles.
-

PROJECTS

NirmaanSetu – Global Construction Ecosystem Platform

Technologies: Next.js, React, TypeScript, Tailwind CSS, REST APIs, Material UI

- Developing a large-scale web platform (7+ stakeholder roles) connecting contractors, engineers, architects, suppliers, manufacturers, consultants, and clients within a unified construction ecosystem, targeting 10,000+ users at launch.
- Designing and implementing responsive, reusable, and scalable user interfaces using Next.js, React, TypeScript, Tailwind CSS, and Material UI.
- Integrating REST APIs to support user management, project workflows, business listings, communication, and marketplace functionality.
- Built enterprise-grade dashboard modules with data visualization, filtering, search, and role-based access features, supporting 5+ distinct user roles and real-time data across 4 core modules.
- Following modern software engineering practices including component-based architecture, code reusability, version control, and performance optimization.
- Architecting the platform for global scalability, multi-user collaboration, and future AI-powered features such as intelligent project recommendations and automated workflow assistance.

EDUCATION

Bachelor of Science (B.S.) in Computer Science and Data Analytics

Indian Institute of Technology (IIT) Patna

Expected Graduation: July 2027

COURSEWORK

Data Structures and Algorithms

Database Management Systems

Object-Oriented Programming

Software Engineering

Computer Networks

Operating Systems

System Design Fundamentals

SOFT SKILLS

Problem Solving

Team Collaboration

Communication

Adaptability

Analytical Thinking

Attention to Detail

Continuous Learning
